NOTE.—The great difference in value of Exports for 1873, as compared with 1871 and 1872, arises from the average value of coffee during 1873 in the local market previous to shipment being taken at £4. 10*s*. per cwt. for plantation and £4 per cwt. for native, instead of £2.14*s*. and £2 as heretofore.

The money figures from 1874 to 1885 have been converted from rupees to pounds sterling, at 1*s*. 10½*d*. to the rupee; 1886, at 1*s*. 7*d*. to the rupee. Prior to 1874 at 2*s*. to the rupee.

CUSTOMS.

These duties are collected under and agreeably to the directions of the Ordinances 17 of 1869, 14 of 1871, 39 of 1884, and 8 of 1885, by which all former laws relating to Customs are repealed, consolidated, and amended Ordinance 22 of 1873 and Proclamation of November 10, 1877; under Ordinance 22 of 1877, by which a royalty of 25c. is levied on every cwt. of plumbago exported beyond seas; and under Ordinance 13 of 1869, and Proclamation dated January 7, 1882, by which a royalty of R100 is levied on each Elephant shipped from this Island to any place beyond the seas. Warehouse Rent charged upon goods placed in the Queen's Warehouses is levied by Government Notices dated October 20, 1876, and July 6, 1877, under authority of the 13th clause of the Ordinance 17 of 1869. Export duties are collected under Ordinance 9 of 1882.

PORT AND HARBOUR DUES.

Port Dues are levied under the Ordinances 17 of 1869 and 14 of 1871. The rates are 8c. per ton inwards, and 8c. per ton outwards on loaded vessels. Under this head are also brought to account receipts for the hire of Government boats and moorings, and half pilotage fees recovered under the Ordinance 6 of 1865. For Colombo Harbour a special tariff was published under Proclamations dated November 7, 1882, and May 6, 1885.

LAND SALES.

Under this head are included the receipts derived from the sale of Crown lands and cinnamon gardens, under the rules laid down in the Minutes of the Governor of the January 14, 1857, and May 14, 1875, and the half-improved value of land under the provisions of the Ordinance 1 of 1840; also the proceeds of sale of paddy lands in the irrigation districts, under the Minutes of February 27, 1857, and May 21, 1868, and grants of land under the Minute of August 8, 1844.

LAND REVENUE.

Rent or Tax on Paddy.—The receipts classed under this head are derived from the rent or tax of one-half, one-third, one-fourth, one-fifth, one-eighth, one-tenth, one-fourteenth, or one-twentieth of the produce, according to the tenure on which the lands are held. The tax is levied on the authority of immemorial usage, and is particularly recognised by the Proclamations of September 3, 1801, April 22, 1803, and November 21, 1818, and the Ordinances 14 of 1840 and 29 of 1865. In the Central Province this tax was, till 1826, levied by an annual assessment of the crop of each harvest, and was chiefly collected in kind. In the districts adjacent to the town of Kandy, the assessment was then commuted with the consent of the proprietors for the annual payment of a given quantity of grain, which arrangement continued in force till the end of 1830, when that system was further extended by giving the proprietors the option of paying the assessment either at a fixed rate of money or in kind, and even of redeeming the tax in perpetuity by payment of the assessment for 20 years. In 1832, the first settlement having expired, a renewal of the commutation assessment was entered into throughout the former commuted Districts. In the North-Central and North-Western Provinces the renting system alone is adopted. In the Northern Province the average of the renting and commuting systems is nearly equal. Commutation was facilitated by Ordinance 11 of 1878, and has been effected all over the Western, Southern, and Eastern Provinces.

Rent or Tax on Fine Grain.—Recognised by the Proclamations of September 3, 1801, and April 22, 1803 (which impose generally a tax of one-tenth on the produce of all high lands, viz., of lands not adapted to the cultivation of paddy), and recognised by the Ordinances 14 of 1840 and 29 of 1865. In the Western Province this tax is levied in the old Kandyan divisions only according to the tenure on which lands are held, or according to the ancient usages and customs of the country. The proceeds sale of illicit cultivation of fine grain on Crown land are also brought to account under this head. In the Northern Province the rate of tax is one-fifth for jungle cultivation, and one-tenth for all the others. In the Kandyan territories, fine grain is exempted from taxation, under the Proclamation of November 21, 1818.

Rent of Gardens.—This revenue is derived from the produce of Government gardens, either rented or collected in aumani (that is in kind). In the Central Province the rents derived from small Crown lands and on reserved Crown lands on sides of public roads which are permitted to be cultivated, are also brought to account under this head.

Land Rents Redeemed, improperly termed "Tythes Redeemed."—A measure adopted in 1813 by Government, under the conviction that cultivators of Crown paddy lands would cultivate them more carefully and with greater advantage to the revenue if subjected to payment of one-tenth only, instead of the one-half or one-fourth. The redemption is effected by the occupier paying ten years' value of the difference between one-tenth and the share hitherto payable, in four instalments. The permission to redeem the rent altogether, which was at one time granted on the application of the owner, has been suspended.

Rent of Lands.—The receipts under this head are collected from the rental of Government lands, leased at will, and a fixed rate per acre on Government lands encroached upon by private parties.

Royalty on Cabook Stones, &c.—A payment of R3 and 75c. is levied on every 1,000 cabook stones cut from the Government pits in the districts of Colombo and Negombo; of 50c. per 100 cubic feet of sandstone quarried between Hendala and Pamunugama; and 6c. on every cart-load of white sand removed from the Maradána cinnamon gardens.

RENTS, EXCLUSIVE OF LANDS.

His Excellency is also pleased, on the recommendation of the Superintendent of Wrecks, to approve of the following Regulations for the guidance of Receivers:—

1.—*Receivers will bear in mind that the principal object of the Ordinance 5 of* 1861, *and of their appointment thereunder, is*—

1st—The rendering of assistance.

2nd—The protection and preservation of wrecked property, and the restoration thereof to the owners.

3rd—The protection of the Customs revenue.

4th—The settlement of salvage claims.

The provisions of clauses 3, 7, 8, 14, 16, 17, 21 to 27, and 31 to 32 give them full powers to carry out these objects.

2.—*Inquiries into Wrecks and Casualties at Sea, clause* 3; *Ships in distress, clause* 14.

In making these inquiries the officer will remember that he is exercising a highly important function, and that his report may be the foundation of proceedings deeply affecting the interests of individuals. He must therefore most carefully endeavour to arrive at the truth, and should especially direct his attention whether the casualty happened from avoidable or unavoidable causes,—particularly as to the (*a*) unseaworthiness or insufficient equipment of the ship; (*b*) insufficient or improper manning; (*c*) improper loading, overloading, bad stowage; (*d*) misconduct, incompetency, or neglect of master, officers, or crew: (*e*) ignorance of lights, or navigation of the coast; (*f*) neglect of heaving the lead.

3.—*Custody of wrecked property, clauses* 9, 16, 17, *and* 18.

Clause 9.—This clause refers to property recovered from a ship wrecked or in distress at the time of wreck or casualty, and the object of its provision is to secure the property in the confusion which attends a shipwreck; to protect the Customs' revenue; to provide for payment of fees, expenses, and salvage claims. But if the master, or if the owner, or any duly appointed Agent of owner or master is in possession, and is able to take and keep custody of the property, and if all claims are paid or provided for by proper security, the Receiver need not take possession or detain the property, but he will offer his services, and render such assistance as may be required.

Clauses 16 and 17 refer to wreck saved or taken possession of at any other time.

Clause 18.—This notice should be given when the wreck in custody exceeds the value of Rs. 50, and the particulars of all articles taken possession of by the Receiver will be entered in the Report Book No. 1, per form annexed.

4.—*Wreck arrested by order of Court of Law.*

When a derelict ship in the custody of a Receiver, or other wrecked property detained by the Receiver for the payment of salvage, is arrested by virtue of a Warrant or other instrument of Court, the Receiver should not give up the claims to fees and to any expenses he may have incurred, but should send a copy of his account to the person taking such charge, giving notice of his lien, and that the property must not be restored until the amount of his claims be paid. A copy of the account and notice should also be forwarded to the Registrar or Secretary of the Court issuing the warrant; and in the event of property being restored without payment of Receiver's claims, he should report the circumstances to the Superintendent of Wrecks, and should resume possession of the property until his claims are satisfied.

5.—*Sale of Wreck Property, clauses* 19, 27, *and* 28.

Clause 19 provides for the disposal of wreck of small value, either derelict, flotsam or jetsam, so constantly found on the coasts of this Island; and should the Receiver find it necessary to sell property under the provisions of clause 27, he will, if the property be claimed, endeavour in doing so, if possible to act in concert with the owners and insurers.

All sales of importance and value should be advertised in the *Gazette* and local papers; and notice of intended sale affixed at the Custom House of the Port. The account of wreck sold is to be made in form No. 3 (annexed).

6.—*Salvage, clauses* 21 to 26.

The decisions of questions as to salvage, if the parties cannot agree, must be determined by the Court having jurisdiction in that behalf; but the Receiver has important duties in endeavouring to settle salvage claims amicably, in providing for what may be due by detaining the property saved; in releasing the property

on proper security being given; in selling the property, when necessary, to satisfy the claim of salvors; and in apportioning money paid in satisfaction of such claims; and the Receiver will recollect that, whilst providing for the claims of *bonâ fide* salvors, he must, as far as he can, protect property against vexatious and improper claims.

The essentials of salvage service are—(*a*) the degree of danger from which the lives or property are rescued; (*b*) the value of the property saved; (*c*) the risk incurred by the salvors; (*d*) the value of any property by the use of which the services are rendered, and the danger it was exposed to; (*e*) the skill shown in rendering the service; (*f*) the time and labour occupied.

The salvage should be in proportion to the use of these essentials; but where scarcely any, or only the last exist, and the same is little more than mere work or labour, it should be rewarded accordingly.

The amount of reward should not however increase in direct proportion to the value of the property; and as a general rule it may be borne in mind that the Courts of Admiralty very seldom, if ever, give more than one-half the value of the property saved.

7.—*With a view to encourage salvors and finders of unclaimed wreck and drift goods sold and taken charge of by Receivers under provisions of clauses* 19 *and* 28, *the following rewards may be given, viz.:*—

Upon the net value of property of R25 or under (two-thirds)	-	-	$\frac{2}{3}$
When it exceeds R25 and under R50 (one-half)	-	-	$\frac{1}{2}$
When of R50 and above (one-third)	-	-	$\frac{1}{3}$.

8.—*Delivery of Property to Owners.*

On payment of all sums due for salvage, duties, fees and expenses, the Receiver will deliver up all property which comes into his possession or custody, and the proceeds of such parts of it as may have been sold, to any person who proves himself to the satisfaction of the Receiver to be the owner of such property, or agent duly appointed by him, taking receipts for the same. The owner of the ship being responsible for the cargo, and the master of the ship having, as the servant of the owner, the legal custody thereof, the Receiver will treat the master, when present, as the agent of the owner—not only of the ship, but also of the cargo; unless and until it is clearly proved that the owners of either have put an end to such agency.

9.—*Accounts and Returns.*

The Receiver will keep a Report Book according to form No. 1, in which he will enter the particulars of every description of article taken into his custody. The reference numbers are to commence with No. 1 on January 1 of each year.

The reporting of goods taken possession of for the Receiver should be made according to form No. 2, and the sale account per form No. 3.

The Quarterly Returns, as per form No. 4, are to be forwarded through the Superintendent of Wrecks; and the net proceeds of all wreck, the property of Government as unclaimed, is to be paid into the General Treasury, quarterly, the Treasurer being required to receive such moneys on account of wrecks.

THE REVENUE OF 1885 AND 1886.

Cause of Increase or Decrease

The amount of recoverable arrears outstanding on January 1st, 1886, was smaller than on January 1, 1885; hence the decrease.

The increase under the sub-heads "Imports" and "Warehouse Rent" is due to a larger importation of cotton goods, haberdashery, kerosine oil, spirits, cordials, and other goods, which more than counterbalanced the decrease on imported grain. The increase under the sub-head "Plumbago" is due to a larger exportation of that mineral.

"Port Clearances" show a decrease, due to the smaller number of vessels which called at the out-ports consequent on a decrease in grain imports.

Boats and Moorings," "Pilotage," and "Colombo Harbour Dues."—The increase under these sub-heads is due to a larger tonnage of vessels having called at the port of Colombo.

This decrease is only apparent, and is caused by the rent for the second half of 1884 having been brought to account in 1885.

The increase is to be attributed to the extensive sales of land in the Kaleni valley district for tea-planting. In other parts of the Island there was a decrease under this head.

The increase under "Paddy" is attributable partly to seasonable weather, and consequent good crops, in the North-Western and Northern Provinces, and to the introduction of paddy commutation under the Grain Tax Ordinance of 1878 into the Eastern Province. The increase under "Fine Grain" is also due to better crops in the Northern Province.

Greater activity in the market has apparently contributed to a larger revenue under this sub-head.

The sale of Toll Rents for 1886 realised a smaller return than in 1885.

The decrease in "Arrack" is due to the sale of licenses having fetched lower prices than in the preceding year; and under the sub-heads "Stills" and "Opium," to a smaller demand for licenses, apparently owing to diminished consumption.

An improvement in the chank trade has helped to augment the receipts under this sub-head.

A larger demand for licenses has contributed to swell the receipts under the sub-head "Royalty on Elephants."

The collections on account of stamps sold in 1885 includes R6,048·42, value of stamp defalcation of 1879. When this sum is deducted from the receipts of 1885, the collections for 1886 compare favourably with those of the preceding year.

Prompt recovery of amount due accounts for the increase.

Receipts under this head are fluctuating.

The increase in fines imposed by Judicial Officers may be attributed to greater facilities afforded for the punishment of crimes under the Penal Code. Departmental fines are casual and fluctuating.

The Colonial Steamer worked uninterruptedly during the year, and required no repairs; hence the increase.

				Net Increase -	31685	8¼		

Cause of Increase or Decrease.

Increase due to a larger quantity of salt having been sold during the year. The revenue from this source fluctuates.

Decrease due to a smaller supply of timber having been offered for sale.

The increase under *Government Gazette* is due to receipts for forms, &c., supplied to Provincial Road Committees. The decrease under "Irrigation Works" is partly due to the water-rate for 1886 for the Medayawa tank, in the North-Western Province, having been waived owing to a breach in the tank, and also to smaller collections made in the Southern Province. The falling off in "Survey Fees" is due to the sales of small allotments of Crown land having been fewer than in the preceding year. The falling off in "Value of Prison Labour" is owing to the withdrawal of prisoners from the Breakwater Works on their completion. The decrease in "Passage Money of Immigrant Coolies" is due to a falling off in the arrivals and departures of coolies. The receipts in 1885 under "Cost of Police within Municipalities, &c.," includes also the arrears of 1884 collected in that year, hence the apparent decrease in 1886. The decrease under "Medical Aid Fund" is due to a falling off in the receipts from exports, chiefly coffee. The other items are casual and fluctuating.

The Colony now pays a fixed sum per annum on account of military protection, irrespective of the number of troops in the Island.

Increase due to the larger amount of unclaimed deposits transferred to revenue.

Increase due to investment of a further portion of the currency reserve.
Greater promptitude in the payment of instalments due by renters.

Increase due to the high price realised by sale of the right of fishing in the Tamblegam Bay, consequent on the prospect of successful fishing

Decrease due to a reduction in the number of small allotments offered for sale in 1886.

Increase due to the opening of the extension to Nanu-oya in May, 1885, and to the development of tea enterprise.

EXPENDITURE OF 1885 AND 1886.

Cause of Increase or Decrease.

In 1886 the Badulla district was separated from the Central Province and created a distinct province under the designation of the Province of Uva. The decrease in the Central Province is therefore only apparent, and is counterbalanced by the increase in the Province of Uva.

This increase is accounted for by the appointment of a Provincial Engineer for the North-Central Province and by an increase in the staff of officers.

Increase in the staff of surveyors accounts for this increase.

Employment of four additional Telegraph Masters and increment to Superintendent account for this increase.

This increase and decrease are only apparent, and are caused by the separation of the Badulla district from the Central Province and of its creation into a separate province.

Same remark as the foregoing.

Increase due chiefly to additional staff taken on, consequent on the completion of the extension to Nanu-oya in May, 1885.

In previous years this expenditure was brought to account under the head "Miscellaneous Services."

Cause of Increase or Decrease.

Increase due to depreciation in the value of silver and to pensions granted in the year.
This reduction is chiefly in the expenditure on manufacture of salt.
The reduction in the expenditure under this head is due apparently to the operation of the Penal Code

Relief to destitute villagers did not become necessary to the same extent as in 1885.
Increase in the number of grant schools, and increased earnings of grant schools, together with increase in the payment results to Government teachers and other causes swelled the expenditure under this head.
Increase due to prevalence of epedimic diseases in some parts of the Island, and also to the establishment of five additional outdoor hospitals.
Increase due partly to expenditure in the purchase of uniform and partly to excess credits to be surcharged.
Increase due to the larger number of prisoners incarcerated.
Increase due to rent paid for the office of the Inspector-General of Prisons.
Increase chiefly due to a larger expenditure for travelling having been incurred by the Governor than in the preceding year.

Increase due to larger expenditure on new roads and bridges.
The expenditure for 1885 includes certain items which did not occur in 1886, such as expenses on account of currency notes, &c., and this explains the decrease in the expenditure for 1886.
Increase due to the depreciation in the value of silver, interest being paid in England in sterling.

No repairs effected in 1886; hence the decrease.
This is a fluctuating item of expenditure.
The following lands have been acquired for Government purposes, viz., land below Queen's Cottage, Nuwara Elliya, boutiques near hospital at Vavuniya-Vilankulam, land from Mariawatte estate for forest reservation, for Gampola cemetery, and for Mahara quarry.
Reduction in the number of arrivals and departures of immigrant coolies.
Increase due to depreciation in the value of silver, interest on Railway Loan brought to account under this head being paid in England in sterling.
Depreciation in the value of silver.

AND ACTUAL EXPENDITURE FOR 1886.

Cause of Increase or Decrease.

The net savings in Establishments amount to R78,612·27. The principal decreases are in the votes taken for the Departments of Public Works, Survey, Postal-Telegraph, Public Instruction, and Railway, the amounts allowed not having been fully expended. The excesses over estimated expenditure are chiefly over-credits to be surcharged.

1 The duties of the Judges are to administer justice according to the Administration of Justice Ordinance, 1868, and the Penal and Criminal Procedure Codes, and the Laws of the island; in discharge of the Criminal and Appellate jurisdiction vested in the Supreme Court, which extends over the whole Island; and the duties of the Private Secretaries are to act as Clerks to the Judges, to carry on their official correspondence, and to arrange their notes and judgments

2 The Registrar has the management of all the business of the Court, Criminal and Appellate, and of his Office.

3 The Deputy Registrars keep the Criminal and Appellate Minutes, and assist the Registrar in the management of business of the Court and of the Office.

4 The duties of the Attorney-General are not clearly defined, but are in many respects analogous to those of the Attorney-General in England, though in some respects they resemble those of the Lord Advocate in Scotland. He acts as Legal Adviser to the Executive and every Department of Government. All Contracts and Deeds affecting the Government are prepared or settled by him; and he prepares all the Legislative Enactments of Government. He acts as Public Prosecutor, and instructs Magistrates in Criminal proceedings. All informations in the Supreme or District Courts run in his name, and he, or some one deputed by him, appears for the Crown in most Civil cases.

Fixed Deposits.—Deposits of R500 or upwards are received for fixed periods upon which interest is allowed, Receipts (not transferable) are granted for such deposits, and the amount can only be drawn at maturity, when interest ceases, and the receipt must be then surrendered, duly endorsed. If deposits are intended to be renewed, the receipts endorsed by the depositor, should, to prevent loss of interest, be sent in to the Corporation at due date.

Current Deposits.

1.—Deposit accounts are not opened for a less sum than R200.

2.—Cheques will be refused payment when not drawn on forms supplied by the Corporation.

3.—Cheques on which alterations or erasures have been made, and post-dated cheques, will not be paid.

4.—The Corporation will not hold themselves responsible for the payment of cheques which may have been advised as lost or mislaid. They will do all in their power to protect their constituents, but do not guarantee the non-payment of such cheques.

5.—Packets containing money for credit of accounts, sent to the Bank by peons, should be addressed to the Cashier, and not to the Manager or Accountant.

7.—The Corporation do not recognise trusts, and accounts are only opened in the individual names of one or more persons.

8.—Cheques on the Chartered Mercantile Bank, Bank of Madras, and National Bank of India, or on any sub-branches, intended for the credit of constituents in the New Oriental Bank Corporation, Limited, should be paid in before 1 P.M. The English Bushel is equal to 34 Seers, or 1 Parrah and 10 Seers.

Among the Natives the extent of land is defined by the quantity of seed required to sow it, computed at the amunam measure and its sub-divisions. In fertile lands the seed is not strewed so thickly as in a poor soil; an amunam of good ground, therefore, will sometimes measure twice as many square feet as an amunam of poor soil.

RETURN OF PRISONS AND PRISONERS.

Replies to the Questions, compiled from the Returns of the Respective Superintendents.

QUESTION I.

If the prison is on the separate system, is the separation complete? And if not, what is the separation enforced by day and night, respectively?

The male prisons at Węlikaḍa and Slave Island and Breakwater Jails are on the separate system, with the exception of two temporary wards at Węlikaḍa, in which 144 prisoners are in association. Prisoners placed in a refractory cell for misconduct are in separation by day as well as by night.

Juvenile offenders are in Colombo and Kandy kept entirely apart from adults both by day and night.

At Slave Island there is a ward for men under medical observation, prior to removal to hospital.

At Mahara, Kandy, Galle, and Jaffna, there are from 40 to 100 cells at each prison, which are used for locking up the longer-sentenced or indifferently-conducted prisoners, the rest being kept in association wards.

At the other prisons of the Island there are fewer cells, as stated in answer to Query III.

In all prisons males are invariably separated from females, by day as well as by night.

At Węlikaḍa and Galle known prostitutes are kept in a separate yard by day, and at night locked up in separate cells. At Kandy, also, prostitutes are kept apart from other females. All other female convicts are kept in association. Unconvicted prisoners are kept apart from convicted prisoners. Hulftsdorp and Kandy (old) prisons are almost exclusively devoted to the safe custody of unconvicted prisoners, only a few convicts being kept at these prisons to attend to jail services.

In other prisons, the unconvicted are locked up at night separately, as a rule, and every endeavour is made in the absence of divisional yards to keep them apart by day. This is the more easily done as the majority of convicted prisoners in such jails are at work outside for many hours.

At Węlikaḍa, Slave Island, Breakwater, Mahara, and Bogambra, no unconvicted prisoners are, as a rule, ever lodged.

QUESTION II.

If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The males are supervised by male officers of various grades, and the females by matrons, in all jails.

QUESTIONS III. AND IV.

How many cells are there; and how many associated wards? Taking the *average* number of prisoners in jail, how many cubic feet of space are there for each prisoner during the hours of sleep?

Jails.	Cells.	Wards.	Average cubic feet of space during 1886.

QUESTION V.

How are the prisoners classified?

The classification in the Ceylon Prisons is as follows:—

(1) Males, convicted, who are sub-divided as follows:—

a Penal stage, or rigorous hard labour.

b Second stage, or industrial hard labour.

c Third stage, or industrial light labour.

d Road Ordinance defaulters (except those committed under Ordinance 31 of 1884, who are treated like other hard labour prisoners).

e Simple imprisonment only.

* There were temporary sheds erected in these jails.

(2) Females, convicted, in same class as males.

(3) Males, unconvicted, who are sub-divided as follows:—

a Debtors, Crown.
b Debtors, private.
c Persons committed in default of bail, witnesses, &c.
d Persons committed for further examination by Police Magistrates.
e Persons committed for trial by Superior Courts.
f Persons committed to await sentence and pending appeal.
g Accused persons arrested on warrants in transit to other stations.
h Suspected lunatics committed for medical observation.

[At Colombo, Kandy, Galle, Jaffna, and Batticaloa no lunatics are now committed to prison, proper and separate houses of observation having been provided, which are placed under the control of the Medical Department.]

(4) Females, unconvicted.

These are the recognised divisions for classification, but (except separating males from females) it is not possible in the present stage of the Island prisons to invariably keep these classes distinct from one another, except as stated in reply to Query I.

QUESTION VI.

Is penal labour—that is, labour by treadmill, crank, or shot-drill—in force?

Shot-drill only is in force in most of the prisons for convicted male prisoners, except Road Ordinance defaulters and offenders committed under provisions of local Ordinances for acts not in themselves otherwise criminal.

QUESTION VII.

If so, during what periods of imprisonment, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, &c.; secondly, the length of spells and intervals of rest.

All classes of convicted prisoners in the penal stage, and who are not exempted therefrom by the Medical Officer on account of bodily infirmity, perform shot-drill for two hours in the forenoon, and two hours in the afternoon of every week-day.

The Superintendents all report that this rule is followed, except where its relaxation has been authorised.

QUESTION VIII.

What kind of labour, other than penal labour, is in use?

Within the walls of the prison:—

a All jail services, including cooking for convicts.
b Coir-beating, stone-breaking, and coir-twisting.
c At Welikada, carpentering, printing, mat and brush making are carried on. All the clothing for the prisons of the Island is made up at Slave Island prison, besides the uniform for the officers of the Convict Establishment. There is also a blacksmiths' and tinsmiths' shop at Welikada.
d At Kandy the convicts are employed in breaking stone into metal for sale to the Public Works Department.
e At Negombo, brush, basket, and broom making.
f At Hulftsdorp, Hambantota, Trincomalee, Kegalla, Ratnapura, Kurunégala, and Puttalam, the convicts were also employed in improvements, and additions to the buildings in the respective jails.

Convict labour has been extensively employed outside the jails, as will be seen from reply to Query IX.

QUESTION IX.

If the prisoners are employed beyond the walls of the jail, state—

(1) On what kind of work they are so employed?

At *Welikada*, the convicts were employed in cutting cabook, whitewashing Government hospitals and asylums, and repairing a bridge at Dematagoda.

At *Slave Island* and *Breakwater* in the Breakwater works, stacking metal, carting sand, and filling up the Fort Canal, breaking down the old lime kiln at Beira, and restacking iron at the Colonial Store.

At *Mahara*, in mining and quarrying stone, and breaking into road metal for the Public Works Department, and other departments.

At *Kegalla*, in collecting materials for the new cells.

At *Tangalla*, in putting up a sea-wall, and building a leper hospital.

At *Puttalam*, in building a new Kachchéri.

At *Kandy*, in mining and quarrying stone and breaking into road metal, and in repairs to public buildings.

At *Anurádhapura* and *Mihintalé* in repairs to Public Works.

At *Galle*, in carting water, opening and repairing roads, quarrying and breaking stone and clearing canals in vicinity of the town.

At *Negombo*, in water-carrying and drainage works for Local Board.

At *Hambantota* and *Ambalantota* in collecting salt, and other works connected with the Salt Department.

At *Kurunegala*, in opening out minor roads, and other Government works, including that at the tank.

At *Jaffna*, in water-carrying, &c., building Police barracks, repairing Government buildings, collecting materials and building sea-wall, building new burial ground wall and generally repairing damage done by the two cyclones of 1884.

At *Batticaloa*, in repairing roads and Government buildings.

Besides these special works, the prisoners at outstations are employed in breaking road metal, cleaning and scavenging public latrines and premises, keeping the minor roads in order, as also the grounds about Government buildings, planting Government lands with ornamental trees, punkah-pulling, and sundry other small works.

(2) How are they supervised?

On the Breakwater Works and at Mahara by the Assistant Superintendents, Jailers, Deputy Jailers, and the usual staff of party officers.

At Węlikaḍa the parties are visited by the Superintendent, Assistant Superintendent, as well as the Jailer and Deputy Jailers frequently during the day.

At the Węlikaḍa, Slave Island, Breakwater, and Mahara prisons there is the usual staff of overseers, sub-overseers, and guards, besides the superior officers named above.

Every prison has a Jailer, who visits out-door working parties frequently.

At Kandy, Galle, Hambantoṭa, and Jaffna the convicts are supervised by overseers in addition to the ordinary guards.

At other prisons there are only guards or peons, varying according to the number of prisoners—as a rule, one officer to every ten convicts at work.

(3) How many escapes of prisoners, while being employed beyond the jail, have taken place during each of the last three years?

(4) How are the profits of their labour accounted for?

The value of all labour rendered to the Breakwater Works and at Mahara quarry by convicts, is reported to the Auditor-General monthly, and debited to the Breakwater, and the amount recovered on account of metal is also credited to Government.

An account of the labour contributed to each work is kept, from which the reply to Query XI. is compiled, but no money passes, nor is the labour paid for, except where articles manufactured in prisons are sold, when the actual cash realised is paid into the nearest Kachchéri and brought to account as revenue.

QUESTION XIV.

Is there, or are there, any chaplain or chaplains of any, and what, religious persuasions?

There are no Prison Chaplains, but accredited ministers of all persuasions are admitted on application.

QUESTION XV.

Are religious services regularly, or otherwise, performed for the benefit of the prisoners of any, and if any, what religious persuasion?

At Węlikaḍa, Slave Island, Breakwater, Borella Hospital, Hulftsdorp, and Kandy (new) Jails frequent services are held both by Protestant and Roman Catholic Ministers, on Sundays; and religious instruction is also given by Catechists of various denominations regularly. At other prisons such services are held whenever any Minister expresses a wish to do so.

QUESTION XVI.

Are Roman Catholic priests and Dissenting ministers allowed free access to prisoners of their own persuasion? And are they apprised when prisoners of their respective persuasions enter the prison?

They are allowed free access, but are not informed when any such prisoners enter the prison, unless at the express wish of a prisoner.

QUESTION XVII.

What provision is made for the education of prisoners?

At Welikada education is confined to the juveniles by paid teachers, for three hours a day on week-days, and three hours on Sundays.

At Slave Island and Breakwater teachers appointed by Government hold school from 10.30 to 1 o'clock every Sunday.

At Negombo teachers appointed by Government hold school from 12 to 2 P.M. on week-days, and on Sundays from 6 A.M. to 10 A.M.

QUESTION XVIII.

On what conditions are remissions of imprisonment granted?

Good conduct, by which is meant industrial good behaviour in matters of discipline. Remissions of terms of imprisonment are granted in proportion to the number of good conduct marks earned by prisoners. Ordinarily, the number of marks a prisoner can earn in a week is nine, and the highest remission a prisoner can obtain by uniform good conduct is two-ninths of the whole term of imprisonment to which he was sentenced, exclusive of the period of three months passed in the penal stage. When suitable work is available, all well-conducted, long-sentenced prisoners, who have been over two years in jail, are eligible to earn one additional mark a week on becoming efficient artizans. After they have earned a further instalment of 1,040 marks such workmen are eligible to earn two marks per week extra, and upon earning another instalment of 1,144 marks they become further eligible to earn three marks extra a week; but the number of these is very limited. A prisoner sentenced to three months' imprisonment or under is not eligible for any remission of his or her sentence

QUESTION XIX.

Have coroners' inquests been held on every occasion of a death in prison during the past year? And what were the verdicts?

Every death is reported to the Police Magistrate or Deputy Coroner, and inquires under chapter XVII. of the Criminal Procedure Code are held on every occasion. The number of deaths and inquests held have been as follows:—

Jails.	No. of Deaths.*	Jails.	No. of Deaths.*	Jails.	No. of Deaths.*	Jails.	No. of Deaths.*

QUESTION XX.

(1) What was the sanitary state of the prisons during the year 1886?——Satisfactory.

(2) What were the prevailing diseases?——Dysentery, fever, and diarrhœa.

QUESTION XXI.

What are, shortly, the rules as to diet?

The following is the dietary scale now in force in all prisons:—

	European and Burgher.			Native.			Punishment Diet.		Light Labour Diet.		
Articles.	Full. oz.	Ordinary. oz.	Penal. oz.	Full. oz.	Ordinary. oz.	Penal. oz.	European & Burgher. oz.	Native. oz.	European & Burgher. oz.	Native Adults. oz.	Native Juveniles. oz.

Onions	½	½	0	½	½	0	0	0	0	0	0
Salt and Pepper	¾	¾	¾	¾	¾	¾	0	¾	0	0	0

Curry stuffs.—A sufficient quantity.

The quantities specified are a day's consumption for an adult, and are served out at three meals: one at 5.30 A.M., consisting of bread, coffee, &c.; one at 11 A.M., consisting of one-half of the remaining articles; and the remainder at 5.30 P.M. In the case of juvenile offenders under sixteen years of age a deduction is made of one ounce of bread, six ounces of rice, and one-fifth of the ration of meat.

Full Diet is only given to convicted prisoners who have been actually two years in Jail.

Penal Diet is given to convicted prisoners with sentences of two months and under, during the whole of their term; to other convicted prisoners during the first two months of their sentence.

Ordinary Diet is given to all unconvicted prisoners, and to all convicted not entitled to full, or liable to penal diet.

Punishment Diet is only given when specially ordered as a punishment for breach of prison rules and regulations.

As an exceptional measure, and in view of the more severe labour exacted on the Breakwater Works and Mahara quarry, exceptions are made to the above rules from time to time.

Prisons Office,
Colombo, March 14, 1887.

G. W. R. CAMPBELL,
Inspector-General of Prisons.

* Exclusive of those executed, but includes deaths of prisoners in Civil Hospitals.

† These prisons are the sanitaria of the Department, where old, weakly, and sickly convicts are sent.

ANSWERS.

Western Province.

Leper Asylum, Hendala.—An ample supply. The Kelani river, in the vicinity of the hospital, and the wells in the hospital grounds. The quality of the water derived from these sources is comparatively pure and good ; the drinking water obtained from the wells is, after filtration, free from organic taint ; the river water serves the purposes of ablution. There are seven bath-rooms in connection with the hospital, supplied with hot and cold water, according to the requirements of the patients. The dry-earth system is in use in well-constructed latrines, in which metal pails are placed as receptacles for the excreta, and a quantity of dry and sifted earth reserved for the purpose of deodorisation. The latrines admit of the utmost cleanliness and free ventilation, and are constantly white-washed and disinfected. The sewage is removed twice a day, and incinerated in deep pits at a distance from the hospital.

General Hospital, Colombo.—Unlimited. Four wells. The water is conducted through iron pipes from these wells to two filters, Danchell's and Captain Crease's, erected at a convenient distance from the wards. A patent force-pump is fixed to the principal well. Chatty filters on tripod stands are also used in some wards. Clear, soft, colourless, and free from organic impurities. Arrangements as to baths and lavatories consist of cemented baths built in eight lavatories, to which water is conducted through iron pipes leading from the different wells. There are also appliances for warm baths. The dry-earth system, close-stool buckets are placed for helpless patients, chiefly in the diarrhœa wards. Portable urinals for night use are constructed in the outer verandahs of each ward. The excreta, which have collected in galvanised iron buckets in the latrines, are disinfected with dry-earth and MacDougall's disinfecting powder, and are removed every night by the latrine coolies, and buried at a considerable distance from the hospital. Porcelain chamber pots are used in lieu of the wooden close-stool buckets.

De Soysa Lying-in Hospital, Colombo.—Unlimited. From a well in the compound. Water for drinking purposes is filtered before use in patent porcelain filters. There are two out-houses, one on each side and separated from them by corridors and verandahs. In each range there are dry-earth latrines and bath-rooms, the latter being used as lavatories also. No sewers. Open cemented drains for surface water only. Dry-earth latrines emptied twice a day.

Pánaduré.—Unlimited. From a well on the premises. Good. There is a lavatory for males and another for females. Each lavatory has two cemented tubs. Water is conveyed to them by iron pipes, from a cistern near the well. The dry-earth system is in use. The buckets are removed twice daily, and their contents buried far away from the hospital. Each privy contains three zinc buckets.

Kalutara.—The supply is unlimited. The water is obtained from two wells in the hospital premises. The water is of good quality and fit for drinking. There are two baths connected with the male wards, and one with the female ward. These baths are connected with the wards by covered corridors. The baths are cemented, and have communicating pipes with an elevated cistern near the well. Superficial cemented drains, which carry off the flood-water into the side drains. The latrines are on the dry-earth system, and are kept clean and free from smell. The night soil is removed to a distance, and buried by the latrine contractors of the Local Board of Health.

Kégalla.—Unlimited. A well in the Medical Officer's quarters adjoining the hospital. Very pure. Patients bathe in a stream close to the hospital. Tubs placed in the bath-rooms are available for warm baths. The sewage of the hospital is buried about a quarter of a mile away to leeward of the building. There are no privies, but dry-earth latrines for male and female patients.

Ratnapura.—An unlimited quantity. Water is obtained from a reservoir led by a stream, and it is connected with the hospital by tubing. Good and pure. There is a bath-room, which is divided into two compartments, and supplied with tubs. Clean and in good order. Drainage fairly satisfactory, no stagnation, clean, and dry.

Negombo.—As much as each patient wants. For cooking and drinking, water is supplied by the contractor, who obtains it from some wells near the hospital. For all other purposes water is obtained from two wells in the hospital premises. The water used for cooking and drinking is of good quality, and is the best that can be obtained in the town. There is one lavatory for females, and three for males. For bathing, water is obtained from the wells in the hospital premises. There are no privies, but there is a latrine for females and three latrines for males, which are all conducted on the dry-earth system. The filth from the latrines is removed as often as necessary every day, and buried after disinfection.

North-Western Province.

Kurunégala.—An almost unlimited quantity. Two wells on the premises. Good. It is clean, odourless, tasteless, soft, and free from organic impurities. It is always filtered before being used for drinking purposes. The filters are the ordinary chatty ones, and are kept in good order. There are two bath-rooms, one for males and one for females. The bath-tubs are filled up by the attendants when required. Warm baths are also given in suitable cases. The bath-room for males is rather exposed. It would be advisable to have it enclosed. The dry-earth system is in use here. It answers admirably. The night soil is removed and, after being mixed with earth and carbolic powder, is buried in pits some distance from the hospital ground. The privies are always kept clean and attended to.

Puttalam.—One gallon of filtered water for cooking and drinking, and thirty-two gallons for bathing, for each patient. A spring about one and half mile from the town, from which water is conveyed to a cistern in the hospital, by means of iron pipes. Fresh and good. There are two baths in the hospital, one for males and the other for females. Tubs are placed in these baths. These are daily filled by the servants. Rubbish, &c., is daily collected and burnt. The dry-earth system is used in the latrines, and the contents of the buckets removed twice a day, and buried some distance away from the hospital.

Márawila.—Unlimited. Two wells, situated in the hospital grounds. Pure and wholesome. The drinking water is filtered before use. There are two baths built of cement, one for the male and the other for the female patients. Zinc tubs are set apart for the parangi patients, to serve as baths. The sewerage is buried on land, about a quarter of a mile away from the hospital. There are no privies. There are latrines for the male and female patients respectively, conducted on the dry-earth system. They are clean and free from smell.

SOUTHERN PROVINCE.

A well in the hospital premises and another in the Medical Officer's quarters supply the water for washing purposes, &c.; for drinking, the supply is drawn from the same source as that used for the troops in the garrison, viz., the village of Labuduwa, about three miles from town. The water from the wells on the premises is not sufficiently pure for drinking. It is therefore procured from Labuduwa as stated above. The water is of very good quality, and is always carefully filtered in chatty filters. There are bath-rooms with tubs in them for the use of both male and female patients. The dry-earth system has been in use ever since the hospital was occupied, and answers admirably well. All the closets are in good order.

The water of the well in the premises is made use of for cooking and ablution. Very good, clear, soft, palatable, and free from impurities. There are bath-rooms attached to each latrine, but they are seldom used. The patients prefer bathing in the river. The refuse is carried away by good drains to the bank of the river, and ultimately washed into it. There are no privies; the latrines are on the dry-earth system, the soil cleaned out daily, carted away, and buried in the beach.

Hambantota.—About six gallons for cooking and drinking purposes. A well out of town, sunk at the foot of the sand hills. Good. There is a bath-room, which is only used by patients who are unable to walk, but those who can walk resort to a public well, or to a tank close to the hospital. The latrines are on the dry-earth system. The excreta are removed and buried twice daily in a neighbouring jungle.

Tangalla.—Ad libitum. Two wells in the vicinity of the hospital. Contains °005 parts per million of albuminoid and 17 grains of chlorides per gallon. The drinking water is previous to use boiled and filtered through alternate layers of coarse sand and charcoal, the filtering media being often changed. There is in the hospital premises a bath-room with one tub, out of which the patients bathe, water being daily supplied by prisoners from a well in the vicinity of the hospital. Sewerage is on the dry-earth system. There is adjoining the bath-room a latrine, which is divided into two apartments for the use of male and female patients; there are in the latrine three galvanised buckets, the contents of which, and of the urinal, are removed twice daily by prisoners and buried in the sea-beach, 300 yards away from the hospital.

Brackish, being percolation from the neighbouring tanks, but properly filtered for drinking purposes by a large-sized Lipscombe's filter which is in use. There are two separate permanent buildings, one for each sex. They are provided with separate spouts from one of the wells to conduct water to the baths. There is no system of sewerage, but there are two permanent latrines with urinals attached to each of the bath-rooms, one for each sex; quite clean and in order.

Vavuniya-Vilankulam.—An ample supply for all purposes. From two wells in the hospital premises. Good in quality. The drinking water is always boiled and filtered before use. Two cemented baths—one for the use of the male and the other for the female patients—filled daily by the hospital attendants. Surface drains. Two permanent latrines, one for each set of patients, are worked on the dry-earth system. The contents are removed daily by the latrine cooly, and buried at a considerable distance from the hospital. Close-stool buckets are used for helpless patients in ward. The latrines are clean and in good order.

Point Pedro.—An unlimited quantity. From two wells in the hospital premises. Clear, colourless, transparent, and free from organic impurities, and it is also considered as one among the best in the district. Water for drinking purposes is filtered through chatty filters after boiling. There are two out-houses, one for males and one for females, at some distance away from the wards. In each there are cemented dry-earth latrines and bath-rooms separated by a wall, the latter being used as a lavatory also. Dry-earth system is in use in well-constructed cemented latrines, where iron buckets are kept as receptacles for excreta, which are disinfected every time with a liberal supply of fine and sifted dry earth mixed with a sufficient quantity of McDougall's disinfecting powder, and removed every day by a latrine cooly, and buried in deep pits at a considerable distance away from the hospital premises. The privies admit of scrupulous cleanliness and free ventilation, and are always in a clean and satisfactory state.

CENTRAL PROVINCE.

Civil Hospitals.

Kandy.—Unlimited. Water is supplied by the Municipality. Good. The water is filtered before being used. One large bath-room for the native male wards, and another for the female patients. It is hard, and sufficiently pure for drinking purposes. It is always filtered before use. There are five bath-rooms attached to the hospital—three for males and two for females. They are situated at each end of the building, and are quite distinct from the wards. There are covered passages leading to them. The bath tubs are filled by coolies, and are cleansed immediately after use. The dry-earth system of conservancy is in use here.
